X · x.com/fijacksprop

I build practical web applications, backend systems, dashboards, and client-facing digital products using Django, React, TypeScript, and PostgreSQL. My work spans academic software, client projects, product prototypes, and public web platforms. I also bring a Telecommunication Science background into projects like my Smart Attendance System, where software, short-range signals, and verification logic work together.

FEATURED WORK

Smart Attendance System

Live mobile app · Acoustic Beacon · BLE proximity · Django backend

Built a smart lecture attendance system that verifies student presence using acoustic beacon and BLE proximity signals, with backend validation and session-based attendance proof handling.

Verification

CourtesyChain

courtesychain.com · AI/Web3 platform

Worked on a public-facing platform for an AI and Web3 product, covering interface structure, product communication, responsive pages, and deployment-ready presentation.

Web platform

AI/Web3

Frontend

Product

Trading Bot Analyser

Active prototype · MT5/Exness signal analysis

Developing a prototype that reads and analyzes trading signals from broker platforms such as MT5 and Exness, then estimates the most likely signal direction from available patterns.

Automation

Signal analysis

Python

Client Web Apps & Websites

Professional web apps · Business sites · Brand support

Delivered websites and web applications across multiple sectors, including landing pages, admin features, contact systems, CMS/blog features, deployment setup, and light brand assets.

EXPERIENCE

2021 - PRESENT

Independent Full-Stack Developer

Client work, product prototypes, and web platforms

- Build full-stack web applications, professional websites, dashboards, and business-focused digital systems.
- Develop backend logic, database structures, authentication flows, APIs, responsive interfaces, and deployment workflows.
- Work across Django, React, TypeScript, PostgreSQL, Supabase, Vercel, Render, Netlify, and GitHub-based delivery.
- Support clients with practical digital assets such as landing page content, flyers, business cards, and simple brand materials when needed.

2024 - PRESENT

Web Development Instructor

Tech Center

- Teach web development fundamentals and practical project-building to beginner and intermediate learners.
- Guide students through HTML, CSS, JavaScript, backend concepts, development tools, and project workflows.
- Invited as guest web design instructor for Tech Summit in November 2024.

CORE SKILLS

FRONTEND

React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS

BACKEND

Python, Django, Django REST Framework, REST APIs, authentication, API architecture

DATABASES

PostgreSQL, SQLite, MySQL, Supabase, relational database design

CLOUD & DEPLOYMENT

Vercel, Render, Netlify, AWS basics, server configuration

TOOLS

Git, GitHub, Postman, VS Code, browser dev tools

ADDITIONAL

AI-assisted development, automation tools, Flutter/Kotlin basics, branding assets

EDUCATION

B.Sc. Telecommunication Science

University of Ilorin · 2022 - 2026

Final Year Project: Smart Attendance System using Acoustic Beacon and BLE Proximity Verification.

HIGHLIGHTS

- Built and shipped a live mobile attendance system using signal-based verification.
- Comfortable working across frontend, backend, database, and deployment.
- Experience with client communication, teaching, and practical product delivery.

Available for internships, junior software roles, freelance builds, and client web/product projects.
